IT professional services, IT Services - Panoptics

Professional Services

Panoptics Professional Services provides access to highly experienced and qualified IT professionals who ensure the efficient, smooth delivery of any IT project. Experts in the management of challenging IT deployments and with the pre-requisite skills that safeguard delivery, your business can be confident that every project will be successful. Thorough scoping and planning, in-depth and up to date technical capability and a business focussed approach combine to ensure the benefits expected are the benefits realised.

" I t i s g r e a t w o r k i n g w i t h s o m e o n

Service Delivery

Panoptics only use the highest quality, qualified and accredited individuals to deliver all of our Professional Services.

Project managers use industry recognised methodologies to provide governance, control and visibility whilst our technical staff's accreditations are actively maintained and they are fully abreast of market direction and technology roadmaps thereby ensuring project-readiness.

Business Analysis

Panoptics have the skills and experience to analyse your business goals, processes and resources to provide impartial, pragmatic and strategic solutions to your business. Whether this be through process improvement, organisational change or strategic planning and policy development, our focus is to ensure you get the best return from your IT investments.

Project Management

We believe that all projects should be well structured, measurable and tightly controlled to ensure that the timeline and budget is achieved. Utilising Prince 2 methodology our project managers understand technology, people and how to get the best out of both. Engagements can vary from simply installing a WAN circuit to migrating your entire environment to a hybrid

cloud.

Infrastructure Audits and Reviews

Most organisations need assistance at some point to understand what they have, what they need to do with it and whether it meets their short and long term requirements. Panoptics provides commercial and technical expertise to establish the most cost effective strategy to adopt, in turn enabling you to focus on your core business.

Infrastructure Design and Implementation

Our team of experts have designed and delivered Infrastructure projects to a broad range of customers within diverse industry sectors, as well as developed our own cloud platform. Our project success is due to our inherent skills and experience of only designing the right infrastructure for the specific requirement – one that captures the commercial, technical and ongoing support requirements precisely. Working in close partnership with our customers, we provide the mechanism to enable you to make the right choices for short and long term gain.

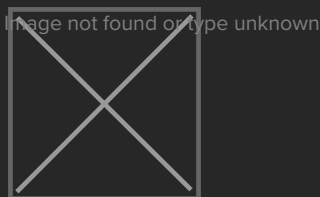

Contract Review and Alignment

At Panoptics we know that robust, efficient IT systems are not only vital to your business, but also expensive. We appreciate that when working in a busy environment it can be difficult to find time to properly review your IT contracts.

With this in mind Panoptics use our extensive knowledge of vendors, the market and industry best practices, including ITIL, to provide contract review services, enabling you to make quality decisions aligned to your needs. Our unbiased, impartial experts will make sure that your business obtains the best services, products and solutions from the right vendor/provider for the right price by ensuring that your requirements are fully understood, translated and positioned with the vendors to achieve the best possible outcome.
