Panoptics launch VMware SD-WAN Work @ Home EMEA Trial Offer

Supporting organisations
with newly distributed
workforces during COVID-19
outbreak

Panoptics are pleased to announce the EMEA launch of the [VMware Work @ Home trial offer](#). As a global VeloCloud, Now Part of VMware, partner, Panoptics are extremely excited to be involved in the launch of this incredible offer to support organisations during the COVID-19 outbreak by providing Enterprise class connectivity to newly distributed workforces.

With the business impact of novel coronavirus (COVID-19) being far reaching and workforces quickly distributed to home or remote work environments, organisations now need reliable connectivity for their staff in multiple locations often with a range of network challenges. Panoptics in partnership with VeloCloud, Now Part of VMware, are pleased to provide a VMware SD-WAN Work @ Home solution, including a 60 day free trial for up to 50 remote workers.

With a quick & simple setup process, organisations can now benefit from the VMware SD-WAN Edge 510 or 510-LTE boxes along with hosted VMware Orchestra & Gateway – quite simply everything an organisation needs to get 50 members of staff up and running on enterprise-class [SD-WAN](#) connectivity, utilising their existing home network connection.

With an understanding that running cloud applications such as Zoom, Azure, Teams and Outlook365 can be a challenge within a home office setting, the VMware Work @ Home solution utilises an existing home network connection and a 4G connectivity if required, to ensure business critical applications and traffic is prioritised, so business can continue even amidst the outbreak.

With extensive experience of deploying SD-WAN solutions around the world, Panoptics are keen to support this incredible offer by ensuring organisations across the EMEA region can access the technology quickly. If you're interested in finding out more, please visit our [Work @ Home page](#) or contact us below

We're always available to discuss any IT Project and would welcome the opportunity to talk it through. Get in touch now and we're confident we will find the perfect solution for your business.
