PANOPTICS

Backup

Simple, secure & easily integrated, Panoptics Backup enables the entire business to be confident that not only is the data backed up but it is easy to retrieve when necessary. Industry leading technology enables one single way of providing short-term recovery, long-term retention and Disaster Recovery (DR), in turn eliminating any worries about data loss or interruptions to your business.

"We needed an offsite replica o machines, and had Storage constr Panoptics scoped and implemented few days and we have enjoyed the additional DR site for less than disks!"

CIO, Clarion Events

Service Description

Panoptics Backup (BaaS) is a hosted, secure, remote storage solution deployed using industry leading technology Veeam.

Hosted and replicated to two UK based Tier 3+ Datacentres (London Docklands and Slough), we provide a robust, flexible backup solution for clients on-premise infrastructure, colocation hosted solutions and Panoptics Hosted Virtual Machines.

With a completely scalable service level framework, Panoptics backup as a service is an efficient & practical remote storage solution for any small, medium or large size business. To provide such flexibility, all solutions are costed on the number of Virtual machines protected, storage the backup consumes (most importantly after de-duplication and compression) and the amount of time backups are retained for.

To ensure the service works perfectly for your company, all implementations include a consultancy exercise to identify the right policies for your specific need and data set.

When data and information is critical to your business, our cost-effective solution provides the flexibility modern businesses need along with the security and functionality to give you confidence that your precious data is in safe hands.

Other Services To Consider

Discover how all of our services work together to deliver additional end user benefits and greater value...click here

Image not found or type unknown

WAN

High quality, secure and uncontended WAN that enables businesses to connect as & when they need to.
