Trusted Access

Panoptics deliver the world’s easiest and most secure Multi-Factor Authentication (MFA) solution, in partnership with Duo. The Trusted Access platform provides a holistic security solution that protects every application you own, whether on-premise or cloud-based, reducing the risk of a data breach from compromised credentials, known vulnerabilities or device exploits. Enterprise level application security made painless.

Service Description

A security solution designed to address today’s enterprise security risks in a world where access to applications is paramount but security threats prevalent.

With employees now working from multiple different locations, using a range of devices including their own personal uncontrolled equipment, secure remote login to your business applications is essential. With Duo’s comprehensive security

solution, we effortlessly confirm the exact identity of your users and the health of their devices before they connect to your applications – eliminating the most common cybersecurity risks at the source.

The Trusted Access platform completely “rethinks” security whilst working seamlessly with your existing technology, people and their devices by protecting your business’s entire application landscape, including both on-premise and cloud-based deployments, using cutting-edge Single-Sign-On (SSO) and Two Factor Authentication (2FA).

By utilising Duo’s simple and easy to use Two-Factor Authentication, your business can verify the exact identity of the user whilst enforcing any specific user access policies. Additionally, the platform will check your user’s devices for out-of-date software and missing security controls, providing yet further control and reducing the threat of software vulnerabilities by blocking any risky devices from accessing your data and applications.

Benefits

- **Protect every business application** with 2FA and SSO
- **Flexible Authentication options** including push, soft token, SMS, Phone Call, U2F, Wearables, Biometrics & HW Tokens
- **Simple, user-friendly login** which every end user will love
- **Complete control** over user and device access policies
- **Identify vulnerable users and devices** by deploying phishing test campaigns within minutes
- **Easily meet compliance requirements** including PCI and ISO 27001
- **Truly out-of-band (OOB) authentication**
- **Isolated from your IT infrastructure**
- **SOC 2 compliant security management**
- **Isolated from primary authentication**
- **Fraud alerting through Deny-with-a-cause**

As one of only a handful of UK Duo partners, Panoptics draws upon its extensive experience to offer all our customers a seamless integration across their entire estate and a single, simple security experience across cloud and on-premise applications alike.

Offering a fully consultative approach to your entire security ecosystem, talk to us today and we can demonstrate first hand the benefits of a Duo Security solution. Call 0203 137 6351 or email hello@panoptics.com
