Service Description

The Infrastructure Support (3rd Line) team will be allocated tickets by Panoptics Service Desk to perform both proactive and reactive tasks, ensuring your IT environment is constantly managed and optimised for consistent, reliable performance.

Our responsibility covers the entire spectrum of requirements, extending to the management and housekeeping of the core infrastructure hardware, operating systems as well as core services including the installation of updates, patches and fixes to maintain a continually optimised IT environment. As such the monitoring of your infrastructure is a pre-requisite for this service.

Our 3rd line support team will be responsible for the management of all hardware and operating systems of the devices within scope, which include:

- Minor patches and security updates (during the quarterly patch window)
- Maintaining reboot schedules
- Ensuring all backup processes are running
- Resolving systems issues or failed operations
- Fulfilling housekeeping duties to ensure the most efficient and effective operation is available
- Resolving incidents relating to systems

Other Services To Consider

Discover how all of our services work together to deliver additional end user benefits and greater value...[click here](#)

ITIL Functions

ITIL best practices combined with real world experience which facilitates an optimised service delivery.

Service Desk
